Hi! Thanks for reading over my resume. I have provided NetSuite back-end and e-commerce website administration for a small business for about 2 years. I have been involved in numerous projects that include inventory and data management, end-user functionality solutions, e-commerce website trouble-shooting, SEO implementation, and visual communication solutions and content creation. I love learning and trouble-shooting and creating dynamic and effective solutions - no matter the solution's form. I can't wait to hear about your projects!
